

PHANPHUM PRATHUMSUWAN

Chatuchak, Bangkok, Thailand | +66 80 595 2200 | phanphump2004@gmail.com | [Portfolio](#) | [LinkedIn](#)

EDUCATION

Mahidol University, Faculty of ICT — B.Sc. Software Engineering

Aug 2022 – May 2026

EXPERIENCE

Full-Stack Developer — *DormiSpace: Dormitory Management Platform*

Aug 2025 – Apr 2026

- Translated client requirements into scalable system architecture, designing RESTful APIs with role-based access control, multi-tenant billing, and analytics dashboard with KPI tracking and revenue trend visualisation.
- Designed multi-party payment disbursement flow — reconciling tenant payments and distributing revenue to individual landlords alongside OCR-based utility tracking and automated billing workflows.

Research Intern at ReaLearn Laboratory — *Tohoku University, Japan*

May 2025 – Aug 2025

- Built an automated Python benchmarking framework to evaluate reliability and failure behaviour across 7 LLMs through repeatable test workflows.
- Analyzed model outputs to identify failure patterns, reliability gaps, and evaluation coverage improvements for AI systems.

Research Intern at Ishii Laboratory — *JAIST, Japan*

Jun 2024 – Aug 2024

- Evaluated system control design against formal specifications, identifying compliance gaps and control deficiencies — producing audit-ready documentation analogous to ITGC assessment methodology.
- Translated findings into prioritised design recommendations for both technical and non-technical stakeholders.

PROJECTS

JavaFlame Test Suites

- Extended an open-source Java flame graph debugger (92 ★) with 10 test suites using formal input domain modelling, personally owning 2 suites and applying ACoC and PWC coverage strategies across five white-box testing approaches.

GoodPoliz: AI-Assisted Police Operations System

- Owned end-to-end testing for a multi-stakeholder operations management system: Flutter UI workflows, backend unit tests (JUnit + Mockito), and manual system testing with requirement traceability matrix.

Gemini Telescope Control System

- Designed and implemented a web-based control system bridging modern RESTful APIs with a legacy control system via UML-modelled architecture, enabling seamless communication across new and existing components.

Online Tutor Search and Management Website

- Designed and implemented backend logic and relational database schemas (SQL) for managing profiles and booking workflows.
- Optimized query performance and matching algorithms to improve system efficiency and response time.

ACTIVITY

Participant in Mahidol AI Hackathon 2 — *Faculty of Information and Communication Technology*

- Collaborated in a cross-functional team to design and implement an AI-based solution for addressing healthcare service challenges.
- Managed data preparation and model integration, ensuring smooth interaction between data pipelines and application logic.

CERTIFICATIONS

- Google Data Analytics — Google / Coursera, Apr 2023
- Using Python to Interact with the Operating System — Google / Coursera, Oct 2024

SKILLS & LANGUAGES

- SAP & ERP: SAP Professional Fundamentals, S/4HANA (MM, FI, SAC), ITGC, control design evaluation, audit documentation
- Database & Systems: PostgreSQL, MySQL, Linux
- Development: Java, Python, JavaScript, SQL, Spring Boot, RESTful API, Flutter
- Testing: JUnit, Mockito, Robot Framework, JMeter
- Cloud & DevOps: AWS, GitHub Actions, Docker
- Languages: Thai (Native), English (IELTS 7.0, TOEIC 895), Japanese (JLPT N5)
