

PHANPHUM PRATHUMSUWAN

Chatuchak, Bangkok, Thailand | +66 80 595 2200 | phanphump2004@gmail.com | [Portfolio](#) | [LinkedIn](#)

EDUCATION

Mahidol University, Faculty of ICT — B.Sc. Software Engineering Aug 2022 – May 2026

EXPERIENCE

Full-Stack Developer — Dormitory Management Platform (Multi-Tenant SaaS) Aug 2025 – Apr 2026

- Designed RESTful API endpoints and normalized PostgreSQL tables for billing, contracts, RBAC, and utility tracking, supporting enterprise workflow management, access control, and structured business data handling.
- Integrated Omise Payment and Google Cloud Vision OCR into automated billing workflows, conducting functional testing, issue resolution, and documentation to support stable post-deployment operations.

Research Intern — ReaLearn Laboratory, Tohoku University, Japan May 2025 – Aug 2025

- Built an automated Python benchmarking framework to evaluate reliability and failure behaviour across 7 LLMs, reducing manual testing effort and enabling repeatable root cause analysis across model outputs.
- Analysed system outputs to identify failure patterns and evaluation coverage gaps, producing structured findings for stakeholders.

Research Intern — Ishii Laboratory, JAIST, Japan Jun 2024 – Aug 2024

- Evaluated system control design against formal specifications using Lustre/Kind2 and Simulink/SLDV, identifying compliance gaps that helped the team improve validation coverage and control reliability.
- Translated validation findings into prioritised design recommendations, supporting clearer decision-making for both technical and non-technical stakeholders.

PROJECTS

GoodPoliz: AI-Assisted Police Operations System

- Owned end-to-end testing for a multi-stakeholder operations management system: Flutter UI workflows, backend unit tests (JUnit + Mockito), and manual system testing with requirement traceability matrix.

Gemini Telescope Control System

- Designed and implemented a web-based control system bridging modern RESTful APIs with a legacy control system via UML-modelled architecture, enabling seamless communication across new and existing components.

Online Tutor Search and Management Website

- Designed and implemented backend logic and relational database schemas (SQL) for managing profiles and booking workflows.
- Optimized query performance and matching algorithms to improve system efficiency and response time.

CERTIFICATIONS

- SAP Professional Fundamentals — SAP / Coursera, May 2026
- Google Data Analytics — Google / Coursera, Apr 2023
- Using Python to Interact with the Operating System — Google / Coursera, Oct 2024

ACTIVITY

Participant in Mahidol AI Hackathon 2 — Faculty of Information and Communication Technology

- Collaborated in a cross-functional team to design and implement an AI-based solution for addressing healthcare service challenges.
- Managed data preparation and model integration, ensuring smooth interaction between data pipelines and application logic.

SKILLS & LANGUAGES

- SAP & ERP: SAP Professional Fundamentals, basic SAP S/4HANA concepts, ERP business processes, ITGC
- Database & Systems: PostgreSQL, MySQL, Linux
- Development: Java, Python, JavaScript, SQL, Spring Boot, RESTful API, Flutter
- Testing: JUnit, Mockito, Robot Framework, JMeter
- Cloud & DevOps: AWS, GitHub Actions, Docker
- Languages: Thai (Native), English (IELTS 7.0, TOEIC 895), Japanese (JLPT N5)
