

PHANPHUM PRATHUMSUWAN

Chatuchak, Bangkok, Thailand | +66 80 595 2200 | phanphump2004@gmail.com | [Portfolio](#) | [LinkedIn](#)

Available immediately through July 2026

EDUCATION

Mahidol University, Faculty of ICT — B.Sc. Software Engineering

Aug 2022 – May 2026

EXPERIENCE

Full-Stack Developer for DormiSpace: Dormitory Management Platform

Aug 2025 – Apr 2026

- Translated client requirements into scalable system architecture, designing RESTful APIs with role-based access control, multi-tenant billing, and optimized PostgreSQL schemas — applying structured requirements analysis similar to SAP solution design.
- Led Flutter frontend development, converting functional specifications into maintainable UI components and reusable modules, maintaining quality through CI/CD pipelines and production-level issue resolution.

Research Intern at ReaLearn Laboratory — Tohoku University, Japan

May 2025 – Aug 2025

- Designed and implemented an automated benchmarking framework to evaluate reliability and failure behavior across seven LLMs, producing structured technical reports communicated to both technical and non-technical stakeholders.
- Analyzed model outputs to identify failure patterns and reliability gaps, translating findings into actionable recommendations.

Research Intern at Ishii Laboratory — JAIST, Japan

Jun 2024 – Aug 2024

- Applied formal verification techniques to evaluate system correctness, producing structured technical documentation and design recommendations for both technical and non-technical audiences — developing client-advisory communication skills.
- Documented system limitations and translated findings into actionable design recommendations, mirroring the process of identifying gaps and advising clients on leading SAP practices.

PROJECTS

GoodPoliz: AI-Assisted Police Operations System

- Owned end-to-end testing for a multi-stakeholder operations management system: Flutter UI workflows, backend unit tests (JUnit + Mockito), and manual system testing with requirement traceability matrix — demonstrating structured project delivery across implementation and testing cycles.

Gemini Telescope Control System

- Designed and implemented a web-based control system bridging modern RESTful APIs with a legacy control system via UML-modelled architecture, enabling seamless communication across new and existing components — paralleling SAP integration design between ERP and legacy application landscapes.

Online Tutor Search and Management Website

- Designed and implemented backend logic and relational database schemas (SQL) for managing profiles and booking workflows.
- Optimized query performance and matching algorithms to improve system efficiency and response time.

ACTIVITY

Participant in Mahidol AI Hackathon 2 — Faculty of Information and Communication Technology

- Collaborated in a cross-functional team to design and implement an AI-based solution for addressing healthcare service challenges.
- Managed data preparation and model integration, ensuring smooth interaction between data pipelines and application logic.

CERTIFICATIONS

- SAP Professional Fundamentals — SAP / Coursera, May 2026
- Google Data Analytics — Google / Coursera, Apr 2023
- Using Python to Interact with the Operating System — Google / Coursera, Oct 2024

SKILLS & LANGUAGES

- SAP & ERP:** SAP Professional Fundamentals, ITGC, control design evaluation, audit documentation
- Database & Systems:** PostgreSQL, MySQL, Linux
- Development:** Java, Python, JavaScript, SQL, Spring Boot, RESTful API, Flutter
- Testing:** JUnit, Mockito, Robot Framework, JMeter
- Cloud & DevOps:** AWS, GitHub Actions, Docker
- Languages:** Thai (Native), English (IELTS 7.0, TOEIC 895), Japanese (JLPT N5)
